

Comparison of 4" Risers for Crusader XL Series

The Osco 9015 4" Riser can replace the Crusader 4" Riser on some applications. It is a direct OEM replacement for the Crusader RO29015 Riser and will also replace the Crusader 98126 Riser and Barr CR20-98126 Riser in circumstances where there is no space limitations. The OSC9015 Riser is 8 1/4" High. The original Crusader 98126 Low Profile Riser and the Barr CR20-98126 Riser are 6 3/4" High. All three Risers are available from Basic Power Industries.

OSC9015
4" Replacement Riser
Crusader XL Series
8 1/4" High 31 lbs
\$139.00 USD

CRU98126 / BARCR20-98126
4" OEM Riser
Crusader XL Series
6 3/4" High 24 lbs
\$149.00 USD

Above is a front view comparison of both sizes of riser side by side.

Pictured above is the Osco 9015 Riser over the OEM 98126 series (Crusader/Barr) Riser. The main difference is the height. Certain applications may require the OEM sized Riser due to space limitations.

Above is the exhaust port view of both sized risers side by side.

Here you can see how much bigger the Osco Riser is, when placed directly behind the OEM sized Riser.
